This is an urban plot of 1000 m² located in the peaceful and sought-after area of El Tosalet in Jávea. The plot has its own well that contains spring water, which is a great advantage for the use and maintenance of the land. Currently, the plot is for sale with a construction project; we have the plans that serve as a proposal for possible design. These proposals are intended to help you envision the different options and possibilities that the land offers. It is important to highlight that the owner has already submitted a project to the town hall that has been approved, so construction can start right away! The urbanization costs have also been paid. This plot is an excellent opportunity for those looking to invest in a piece of land with potential in a privileged area, with the flexibility to design their home or project to their specification.
